The mark of responsible forestry

F.S.C. Forest Stewardship Council

Its purpose is to promote responsible management of the world's forests through developing standards, a certification system and trademark recognition. The process of tracking a product back to forest is called "Chain-of-Custody (C.O.C.) Certification.

Through the C.O.C., companies can demonstrate their commitment to the environment and responsible forest management.

Over 99% of the Melamine faced chipboard used in the manufacture of office and leisure furniture has been sourced from FSC certified suppliers.

The 1% remaining material, although not FSC, is sourced from non-controversial sources.

No trees are cut down specifically to produce M.F.C.

Edging

Superior high impact resistant edging is used on all our board finishes in preference to the less environmentally friendly Polyvinyl Chloride (PVC).
