

The image displays a close-up view of a wood-grain texture, specifically an oak melamine finish. The grain is characterized by vertical, slightly wavy lines that create a sense of depth and movement. The color palette is a range of warm browns, from light tan and beige to deep, rich chocolate and near-black tones, which are distributed unevenly to mimic natural wood. Several small, dark, circular knots are visible, adding to the realistic appearance of the material. The overall texture appears smooth but with subtle variations in tone and grain direction, typical of a melamine-coated surface.

Oak Melamine

The image shows a close-up of a light-colored wood grain, specifically maple, with a melamine finish. The grain is vertical and shows natural wood patterns and some minor imperfections like small dark spots and faint lines. The overall tone is a warm, pale beige.

Maple Melamine
