## Specification

### Product Principles

**Touch** is a simple, easy to specify range of system components that can be shared. Consisting of a top supported by an understructure comprising of a beam, outriggers and leg frames incorporating a unique head block casting.

There are 2 types of leg frames available. Traditional C-frame and contemporary A-frame. A-frame is particularly suited to shared components on Bench and Clusters. Both are available as fixed or height adjustable.

Extent of range			
Type	Freestanding	Cluster	Bench
Rectangle	A+C frame		A frame
Wave	A+C frame		A frame
Double Wave	A+C frame		A frame
Core	A+C frame	A frame	
Workcentre	A+C frame	A frame	
Delta	A+C frame	A frame	
Management Desk	A+C frame		

Cable management can be incorporated vertically using an umbilical attached to the beam or a sock attached to the leg. Horizontal cable management is achieved through optional 'lay-in' cable extrusion or high capacity baskets attached to the beam incorporating a 'wipe-in' extrusion for cable segregation.

**Intelligent codes:**

There are 3 stages to the codes: product type, top finish and structure colour.

**Product type**

Below is a product code matrix to aid ordering:

For example: **THWWAHA1610R** is a Touch Wave Desk with height adjustable A frames 1600 x 1000/800 right hand.

Range	Top Shape	Leg	Size	Configuration
TH - Touch	D = Desk	C = C Frame	Length, depth, module size (bench)	R = Right hand return
	WW = Wave	A = A Frame	eg:	L = Left hand return
	WDW = Double Wave	CHA = C Frame height adj.	1680 = 1600 x 800	CO = Corral
	WC = Core	AHA = A Frame height ad.	16166 = 1600 x 1600 x 600 x 600	CR = Cruciform
	WD = Delta		12128 = 1200 x 1200 x 800	S = For 4 screens
	MAD = Management Desk		481614 = 4800 x 1600 x 1400	
	R = Return			
	ME = Meeting End			
	MR = Meeting Rectangular Table			
	MC = Meeting Circular Table			
	B = Bench			
	WB = Wave Bench			
	DWB = Double Wave Bench			
	W4C = Core Cluster			
	W3 = Delta Cluster 3 person			
W6 = Delta Cluster 6 person				

Component code	
T = Top	HB2 = Head Block (pair)
MP = Modesty Panel	SP = Spider
B = Beam	SL = Single Leg
OR = Outrigger	CB = Cable Basket
CF = C-Frame	WIP = Wipe in cable management
AF = A-Frame	SOCK = Sock vertical Cable management
SF = Straight Legs	UMB = Umbilical vertical Cable management
RF = Return Leg	

Alternatively, Touch can be ordered at component level for example: **THT1680CHS** would be a 1600 Desk top in Cherry.

**Top finish**

Tops are available in 6 different MFC finishes and 1 laminate finish. All are 25mm thick and have self coloured ABS edging (S).

Code	Description
OMS	Oak MFC
BMS	Beech MFC
EMS	Maple MFC
CHS	Cherry MFC
WNS	Walnut MFC
WHS	White MFC
BKLS	Black Laminate

**Understructure**

The understructure consists of a single beam available in a variety of lengths for different applications positioned 300mm from the back of the desk. Leg frames come pre-assembled complete with a Head Block casting ready for attachment to the beam using an outrigger ordered separately. Head block castings and outriggers clamp directly to the beam on assembly. Core and Delta workstations require the use of spiders to join the beams together. They are available pre assembled to various configurations. All hidden understructure components are painted Metallic Silver (MGo6). Leg frames and outriggers have three colour combination options:

**Leg frame** colour options and codes

Code	Description
MGo6	Metallic Silver with Storm Grey Beam End Cap
BKLP	Textured Black Legs & Head Block with Chrome Beam End Cap
BKPO	Textured Black Legs, Polished Head Block and Chrome Beam End Cap

**Outrigger** colour options and codes

Code	Description
SG42	Storm Grey
BKLP	Textured Black

Below are simple one line codes for the most popular products and configurations. In addition, the finish codes for the tops and leg frames should be added as a suffix.

For example:

**THDC1680CHSMGo6** Touch 1600x800 C frame fixed height Cherry MFC Silver leg frames Cable management, modesty panels and screens must be specified separately.
