BREAK STATION MICRO

..“When space is a premium”

With ever increasing pressures at work, breakout areas are becoming an integral part of the modern office environment.

Staff, clients, delegates.. Are all able to relax, refresh and conduct their business in an informal area where soft or café seating is located.

Every breakout area should have refreshments available and our stylish, functional and compact BREAKSTATION MICRO has been developed for such a task where space is a premium.

Being able to supply hot drinks and fresh chilled water through worktop machines, along with the fridge / cooler unit within for soft drinks, the compact unit services the hospitality needs of the users, allowing them to be more creative and dynamic whilst frequenting the area.

The BREAKSTATION MICRO is totally free standing and will connect to floor box or wall mounted services. This allows the units to stand almost anywhere within the office and also makes for easy re-siting during the inevitable office move.

Long Over Shelf accepts coffee machines to 500mm high.

150mm deep drawer with stylish stainless steel handle.

Access cut out to rear of unit for power & water supplies.

Large Cooler Illuminated & lockable with silver door surround & handle.

Mini Cooler 50ltr with silver door surround & handle.

Internal chrome bin, auto open with door. Storage shelf above.

Coffee machines and water coolers are for show purposes only and are not included with the BREAKSTATION MICRO.

BREAKSTATION MICRO can accommodate nearly all worktop coffee machines & water coolers.

Full cable and pipe access through unit and top.

Services accepted to unit from floor box or wall.

Over shelf lengths available to suit existing coffee machines.

BREAKSTATION MICRO hospitality units can suit almost all applications, but if so desired, our manufacturing facility can create for you a "unique special" to individual specification.

Contact us for any non standard product or corporate standard scheme required.
